ABOUT US

WELLNESS, YOUR WAY

We couple cutting-edge technology with traditional treatments, believing that both approaches bring tangible benefits and can work in harmony to accelerate the benefits of taking time out for yourself. Honouring the ancient healing properties of essential oils, salt and mud, our traditional treatments and rituals are offered alongside high-tech specialist therapies. Effortlessly combining old and new to bring you closer to optimal wellness, in your own time and your own way.

PROGRAMMES

Camiral Golf & Wellness' selection of programmes are renowned for combining the modern wellness elements of technology - including Cryotherapy in Spain's only MECOTEC double chamber - with more traditional therapies. This combination gives you the most holistic experience.

We have three key tech treatments available: Cryotherapy, Photobiomodulation and Oxygen Chamber Therapy. Cryotherapy will reset your mind and body at temperatures dropping to -110°C , helping to reduce muscular pain and boost your mood. Photobiomodulation delivers energy into the cells to deal effectively with pain, inflammation and skin repair. And, Oxygen Chamber Therapy is medically proven to calm the mind, stimulate neural pathways and speed up post-workout recovery.

We also have a number of treatments available from Icoone®, which uses the new, patented Roboderm® technology to treat the skin, improving everything from wrinkles to water retention.

Enrolling on one of our programmes gives you much more than just a treatment. Our experts are on hand to guide you through every step, working with you towards specific goals in a sustainable way. Our programmes include:

Detox & Cleanse

Purify your body and mind with a holistic detox programme combining advanced therapies, personalised movement sessions, and nourishing cuisine to leave you feeling refreshed and energised.

Longevity & Vitality

Boost vitality and rejuvenate your wellbeing through personalised fitness, luxurious treatments, and antioxidant-rich nutrition in a serene and inspiring natural setting.

Wellbeing

Find balance and tranquillity with a restorative programme blending advanced therapies, mindfulness, and calming practices to soothe the mind and body.

We also have a number of celebratory programmes designed to add a little something extra to your big moments. Our specially designed programmes can be tailored to your needs. Our celebration and spa cation packages are designed for mums to be and brides to be as well as anybody celebrating a big life moment. Or perhaps our sports recovery program for effective post-training recovery.

With your needs in mind, our treatments and programmes at the Wellness Centre combine the best of modern technology, traditional therapies, and personalised care to support your journey towards optimal health and balance. Whatever your goals, we're here to help you...

Eat, Play, Stay Well.

Whole-Body Cryotherapy -110°C

€65

Time in cryo chamber: 3 minutes

At -110°C, the body and mind have a chance to reset. At this extreme temperature, the blood retreats to the organs to protect them, and as you come out of the chamber it floods through the body, boosting the entire circulation system, reducing adrenal stress and releasing endorphins. Cryotherapy is a safe way to support detoxification, reduce muscular pain, treat chronic inflammatory diseases and aid recovery and sleep – as well as producing an overall improved sense of wellbeing and glow to the skin.

Oxygen Chamber Therapy

60 minutes

€65

Oxygen is the source of life, supporting your immune system and boosting red blood cells which carry rejuvenating energy to every part of the body. This therapy is medically proven to calm the mind, stimulate neural pathways and speed up post-workout recovery. It requires no more than breathing inside a chamber in which raised oxygen levels, and a higher-pressure atmosphere, deliver up to 20 times more oxygen into the bloodstream.

Photo Bio Modulation

20 minutes

€65

This FDA-approved light therapy treatment delivers energy into the cells to deal effectively with pain, inflammation and skin repair. Red laser light stimulates ATP energy production that powers cellular regeneration. It is particularly effective following medical aesthetic treatments or even used after a face, hair or body mask for overall skin health.

Pressotherapy

30 minutes

€50

Pressotherapy - or lymphatic drainage - uses a gentle air pressure to activate your lymphatic system to encourage the elimination of toxins. From pregnancy to post-workout, general drainage to help with circulation, this treatment helps to reduce fluid retention and revive your body.
